Welcome to the International Adoption Disruption Survey.

Over the past six months, we have conducted a pilot survey on the quantity of international adoption disruptions/dissolutions that we could find on the internet. We easily found 57 cases from the past few years. We know that there are many more.

Our goal is to gather information about as many international adoption disruptions that occurred in any country in any year. We plan to collect the data over the span of one year- June 2011 to June 2012- with the possibility of extending the survey. We will publish non-identifying data on our website and share non-identifying data with regulatory bodies and the media. Our hope is that the depth of information that we collect will be instrumental in establishing better pre-adoption education and post-adoption support.

Awareness of the problem of disruption has to occur before this problem can be dealt with. Since no one in the government or adoption industry is willing to take this on, we will.

The reporter of information does NOT need to be the Adoptive Parent who disrupted nor the Adoptive Parent that adopted from the disruption.

We will require at minimum a traceable email address. We would prefer as much information about the case as is known. There are only a few mandatory questions. If you do not know the answers to questions, just continue to the next question or click "unknown" option.

The pdf version of this survey is available at http://reformtalk.blogspot.com We recommend reading that first so you can have answers ready to input into the survey. You may also email the completed survey to rallyreform@yahoo.com.

Names of children and Adoptive Parents will not be disclosed to anyone but the three adoptive parent owners of REFORM Talk that are collecting data.

Any entry with extremely vague information (like girl from Russia 2000) will not be included in the final results, but will be noted in a separate place in the report.

One survey per child disrupted will be required so in the event of disruption of a sibling group of 3, for instance, 3 surveys need to be completed.

Please direct all questions to rallyreform@yahoo.com .
